Via Cherio, 7 - 24060 ZANDOBBIO (BG) ITALY Tel +39 035 94 00 60 E-mail info@belottitiles.biz www.belottitiles.biz

Sustainability primarily begins by durability of Belotti Tiles - Terrazzo Agglo and the efficient and careful handling of energy and resources needed

Our company stands for producing only ecofriendly and recycled material entirely resin-free , composing Marble chips, cement and water to a high end product “Made in Italy” since 1955

“Our materials are made of materials with a past”

Our Mission

It is our mission to promote the use of marble-cement agglomerates that provides excellent levels of performance. We invest constantly in innovation and in our plant and equipment, because we believe that improving existing products and developing new ones is essential in order to maintain the highest quality standards in our marble-cement.

The design of our Agglostyle Terrazzo series sets trends, and our vast range of colors ensures that you get the material best suited to your specific needs. Being cut from slabs that have, in turn, been cut from solid blocks of terrazzo, all our marble-cement agglomerates can be personalized and made specifically to meet your specific design needs. Our team of technicians is at your full disposal and will work with you throughout your project, from selecting the right material to installation and on through maintenance of the finished product.

Production

Our product is an inimitable, one-of-a-kind union of tradition and innovation that continues to evolve in order to meet the needs of even the most demanding projects.

Although Terrazzo was once seen as a material without great value, today, thanks to an evolution in both technique and technology, this marble-cement agglomerate is now highly sought out around the world. The creation of terrazzo blocks, subsequently cut into slabs, ensures the versatility, durability, and design of our products.

Constant investment in new technology throughout the production process enables us to work to certified high standards of quality. Our terrazzo blocks are subjected to recurring quality controls to ensure our material is durable and safe. Checks are carried out by German Institutes on the BELOTTI TILES to assure and guarantee constant optimal quality of its products, in compliance with the internationally European EN 13748-1 norms. Terrazzo also features good elasticity and is ideally suited to being used in areas subject to significant changes in temperature. The research and development behind Belotti Tiles materials enables us to create terrazzo blocks from various types of marble chips and to create exclusive colors to meet your specific needs.
